Hybrid nanocomposite materials for energy storage and ...

Abstract. Functional Hybrid materials based on conducting polymers and inorganic photo-electroactive species provide a wealth of opportunities for the development of novel materials with improved properties.

Importance of Dispersion on the Stability of the Concave ...

The preference for concave mode binding of the CpM unit with sumanene in CpM( 6-sumanene) + (M = Fe, Ru, Os) over the convex mode is analyzed by various density functional theory based methods including (or not) dispersion and solvent effects.

Comparison of Two Xenograft Materials Used in Sinus Lift ...

Detailed information about graft material characteristic is crucial to evaluate their clinical outcomes. The present study evaluates the physicochemical characteristics of two xenografts manufactured on an industrial scale deproteinized at different temperatures (non-sintered and sintered) in accordance with a protocol previously used in sinus
