The musculoskeletal system is the combination of the muscular and skeletal systems working together and includes the bones, muscles, tendons and ligaments of the body. What does the musculoskeletal system do? The musculoskeletal system provides our bodies with shape, protection of our internal organs and the ability to move. What is the Musculoskeletal System? (with pictures) All of the bones, cartilage, muscles, joints, tendons and ligaments in a person's body compose what is known as the musculoskeletal system. The bones provide the body with a framework, giving it shape and support; they also serve as protection for internal organs such as the lungs and liver.
