[Review of Jaffe, Klaus: What is Science?: An ...](#)
Jaffe's account of science is based on three fundamental ideas (p. 28). The first is the idea that doing science is not natural for humans, in other words, our cognitive apparatus was not created (by evolution) to do science. The second idea is the requirement that scientific theories should be rational and

[What is Science: An interdisciplinary evolutionary view ...](#)

Everybody seems to know what science is, but very few can describe precisely what it is. This book will help lay persons and science students to focus on the fundamental issues in science, rendering their explorations of nature, humans and society more efficient.

[What Is Science?: An Interdisciplinary Perspective by ...](#)

In What is Science?, Jaffe seeks to define science conceptually. Understanding our environment and ourselves is and has been the most important intellectual activity of mankind. It was only after the emergence of the empirical science (i.e. experiment philosophy) that humanity achieved accelerated

Electric battery - Wikipedia

A battery is a device consisting of one or more electrochemical cells with external connections provided to power electrical devices such as flashlights, smartphones, and electric cars. When a battery is supplying electric power, its positive terminal is the cathode and its negative terminal is the anode. The terminal marked negative is the

The effects of the bit part 1

The effects of the bit part 1. The way bits work explained using a 3D-model. In this part it's explained why horses ridden with bits so often open their mouths. With a lot of thanks to Dr. Cook
